Never in the history of the store trade has there a cooking stove or range been placed on the market, that has so nearly supplied the demands of the public, and given as universal satisfaction, as the Badger. The ideas in this invention were first, to construct a fire pot and grate, so as to hold a continuous fire. Second, to construct tubes for heating the oven in all its parts alike and all boiler holes, at same time. Third, an auxiliary air chamber, surrounding the fire pot and air passages, to admit fresh air into the oven. For sale by John Griffiths, Milwaukee St., and 50 North Main St.
For valuable Bicyclopedias, call at Sutherland's bookstore.

THE DAILY GAZETTE.
Has increased its circulation twenty-five per cent during the past year. As an advertising medium it is recognized as reliable and effective.
THE WEEKLY GAZETTE is without a rival in the country. The rates of advertising are always based upon circulation. If you have anything to say to the people of the city or county you can speak to more of them through the columns of the GAZETTE than through any other medium published in the same territory.
NOTICES.
—The militia companies meet for drill this evening.
—The question of buying a grand piano is being agitated in the Choral Union.
—Mrs. E. M. Hyzer pleasantly entertained the east side whist club last evening.
—The members of All Souls society held a pleasant social at the church parlors last evening.
—Invitations are out for a social ball at the Young House, Broadway, on the evening of Dec. 24th.
—The young people will turn out in full force at the Y. M. C. C. dance at the Rialto's armory this evening.
—The Woman's Mission Circle of the Baptist church will meet at the church to-morrow afternoon at half past two o'clock.
—Christmas is beginning to make itself felt in the postoffice. Bundles and packages are beginning to be very plentiful.
—Hon. J. W. Ostrander, secretary of the Old Fellows Insurance company of this state, visited Wisconsin Lodge No. 14, last evening.
—Janesville Commandery No. 2, Knights Templar, assemble in regular session to-morrow night at 8 o'clock at Masonic hall.
—The beautiful floral designs displayed at the funeral of John T. Cunningham this morning, were from the green house of Walter Helms.
—There were eighty-four vehicles of all descriptions, in the Cunningham funeral procession this morning when passing the Milwaukee street bridge.
—Patrick Ryan, of Beloit, the boy that has been on trial charged with burglary has been discharged. The jury agreed upon a verdict without leaving their seats.
—They say that one of our local attorneys awakened considerable interest in the municipal court to-day by his remarks on the various kinds of moulding tools which Ryan was claimed to have stolen.
—The Select Knights, A. O. U. W., held a social gathering at their lodge room in the Lippin block last evening, which was well attended by members and their families, and a pleasant time was the result.
—It was decided last evening that the Choral Union should give a concert on the evening of December 22d. It is to be a public rehearsal of the choruses and part songs that have been taken up during the term. Tickets will be placed at 25 cents.
—Within the past five days Wheeler & Stevens have sold six hundred and forty acres of Minnesota land, belonging to Capt. Piny Norcross, for \$3,500; and eighty acres of land in the town of Rock, and a lot and two houses in this city, all belonging to J. E. Sargent, for \$9,500.
—A number of ladies and gentlemen of this city attended the dancing party at the Johnson house, Johnsons Center, last evening, returning home at an early hour this morning. Of course they all had a pleasant time, Smith & Corlies orchestra furnished the music.
—A special meeting of the committee of the Calceolus society met at Dr. James' Mills' office yesterday and made arrangements to celebrate the birthday of Scotland's favorite bard, Robert Burns. Nothing will be spared to make this one of the best entertainments ever given in Janesville, as elaborate preparations are being made.
—Some of the citizens that visited the artesian well this morning are suggesting that if the well proves to be a dry one it can be used for a mine. One of the visitors picked up from the emptings of the sand pump a piece of genuine anthracite coal, while another found a small gray rock that he is certain is silver ore. The only question is, how they got there. A coal mine would be very acceptable in the neighborhood; but our capitalists will hardly care to invest much money in hunting for one.
—Passengers who happened to be waiting for trains this morning at the St. Paul depot were witnesses of a sad sight. A German, nearly sixty years old, clad in filthy rags, stepped from the south-bound train, carrying a three-months' old babe and accompanied by his wife—a young girl scarcely 14 years of age—desperately sick and poorly clad. The poor child-wife was indeed a pitiable sight as she lay stretched out on the seat, and the neglected infant had its share of misery. Such is life!
—General Lew. Wallace, the distinguished author of "Ben Hur" and "A Fair God", will lecture at Rockford on the evening of January 11th, his subject being "Turkey and the Turks, with glimpses of the palaces and harems." General Wallace has been United States minister to Turkey, and is therefore well qualified to treat upon this subject. General Wallace is at this time one of the brightest lights in literature, and is as much talked about as any American writer. Why not arrange to have him visit Janesville.
—The city of Freeport is now supplied with water taken from eighteen small artesian wells drilled to a depth of 42 feet, and three inches in diameter. The total flow of the eighteen is about 5,265 gallons a minute. When the water gives out, they propose to sink other small wells. The water, however, is by no means as pure as the deep artesian wells at Rockford, and doubtless is largely surface flow. Prof. Smith, of Beloit College, who analyzed it, reported 23,732 grains of total solids per United States gallon. In the deep wells at Rockford the largest amount of total solids in either of these wells is .3780. Yet the professor says the water is reasonably pure and can be used with safety.

AN INCENDIARY FIRE.
An Attempt to Burn an Unoccupied Warehouse.
Another Wild Fire—Blasting for the Fire.
At 10:10 last evening an alarm of fire was sounded by the locomotive whistles in the switch-rails of the Chicago & Northwestern railway, and was quickly responded to by the fire department. In a moment all the fire apparatus was on West Milwaukee street, going up the grade at a two-forty gait. Reaching a point near the depot the drivers headed the procession, and lost track of the location, some of the apparatus went one way and some another, and finally after passing through portions of the fifth and first wards, without coming upon the fire, returned home. Assistant Engineer Blunk was more fortunate than the other officers or members of the department, as he succeeded in finding the fire. It proved to be in the old "yellow" tobacco warehouse, near Canby's saloon, in the first ward, and close to the railway track. The fire was not when Engineer Blunk arrived, but the building was filled with smoke, strongly impregnated with kerosene oil. Some one had evidently poured oil on the building, and then touched a match. Mr. E. J. Kent, who was one of the first to reach the building, found a large bunch of cotton waste saturated with oil on the floor. The waste was near the door of the warehouse. Loss nominal.
Master Harry Hays happened to be near the freight depot of the Northwestern company and first discovered the fire. He went to the telephone in the freight office and tried to call the central office and tell the fire department where the fire was located, but after wringing "his arm off" gave it up, and went to the engineer of the switch engine and told him to sound the alarm on his steam whistle, which he did. There were two persons in the central office at this time, and the night operator says he did not hear any call from the depot nor after the alarm sounded on the whistle. The delay in this instance in receiving the alarm at the engine houses must have been several minutes long enough to allow a fire to get a good headway. It is another warning, in moderate tones, that to make a live fire department efficient, they must have an alarm system that will tell them somewhere near the location of the fire. The location of the fire last night was in place surrounded with other warehouses; was some fifteen hundred feet distant from the fire cis terna, and only one stream of water could have been put on it. Time, therefore, was valuable. Had the fire got well under way, in the buildings in that locality, there is no telling what the result would be. We second the Recorder's motion for a fire alarm telegraph.

AN APPROPRIATE MOVE.
Peter Brown is Asked to Allow the Janesville People to Tender Him a Dinner.
The following petition, which explains itself, has been widely circulated. Its object is a good one and those that have the matter in charge are thoroughly in earnest. The petition reads:
JANESVILLE, Dec. 5th, 1895.
Mr. Peter Brown:
DEAR SIR: Appreciating the great labor and financial outlay you have been to during the past summer in retreating and refurbishing the opera house, for the benefit, comfort and pleasure of the citizens of our city; and knowing that you never expect to receive any adequate returns for your large investments, but must look entirely to the good wishes and commendations of your fellow citizens for your satisfaction; we desire in a slight manner to make known to you such feelings which we know do exist. And we ask that you permit the citizens of Janesville to tender you a reception at your new opera house, when the same is completed, and that you consent that the arrangements may be placed in the hands of a committee to be appointed by the Mayor.

Without Adequate Cause.
Or with apparently no cause at all, child and fever, depending on the cause, germinate and develop in the system. This is a common disease cannot be laid out with quinine. The only way to give it a final and extinguishing quietus, is to use persistently the national antiseptic, which roots it out completely. The process of cure is, of course, easier when the child is sick, but persons who are not acquainted with the nature of the system are sometimes in error as to the cause, and neglect the simple and pleasant remedy, of all others best suited to the progress of this dread and destructive malady. Visitors to our sanatorium, act the part of wisdom if they use the biters as a prophylactic. Rheumatism, constipation, biliousness, indigestion and kidney troubles are removed by the biters.

Thousands
of cases of Consumption are cured every year by Acker's celebrated English Remedy. It is a guaranteed preparation. If it does not help, you will get your money back. Try it. A single dose will show its good effect. Trial bottles 10 cents. Practitioner & Evenson, opp. postoffice.
